

Master in Dental Hygiene

U
LISBOA

UNIVERSIDADE
DE LISBOA

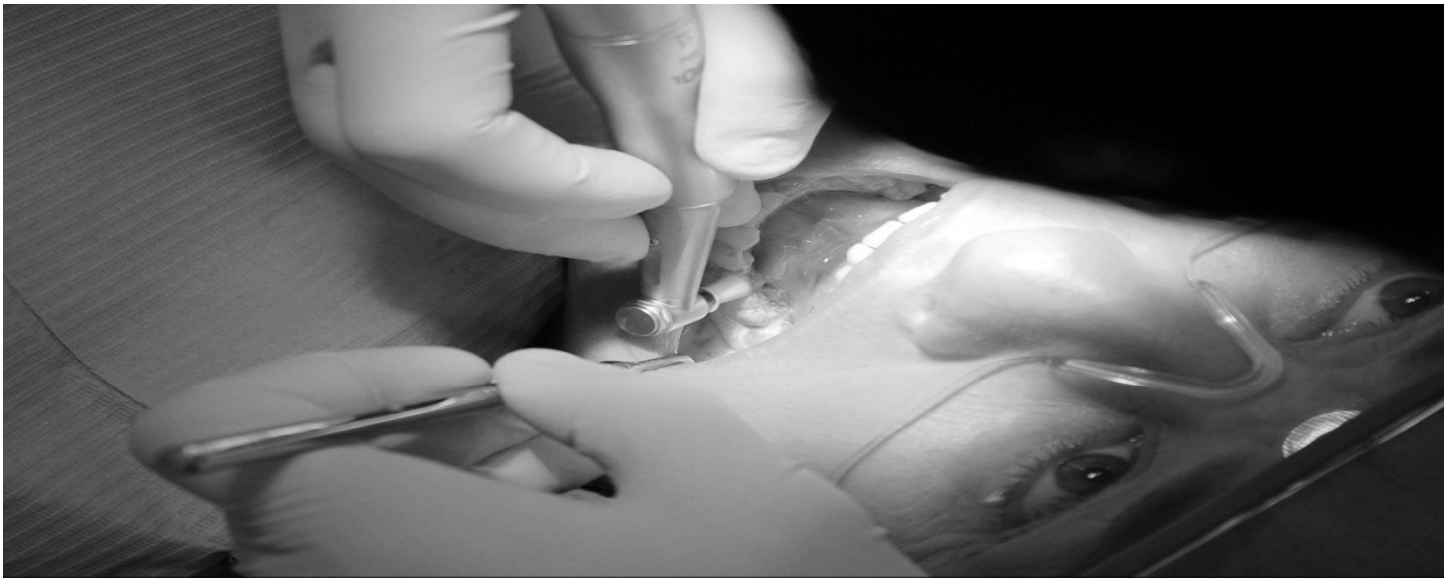

The **Master (MSc) in Dental Hygiene** aims at the acquisition of a broad set of scientific knowledge and advanced skills for the study and research in the field of Dental Hygiene, as well as for the development of practical applications in the respective area of scientific knowledge.

The skills acquired in the course should also enable the professional to have a more active intervention with society, the scientific and professional community, and policy makers, thus contributing to improving the oral health of the population and the national health system.

MAIN GOALS

At the end of the course students should have the knowledge and skills to contribute to the improvement of the oral health of the population and of the health system, either in Portugal and around the world with contributions that are scientifically and professionally relevant, and contribute as a citizen to the improvement of the dental hygiene science, by:

- Gather, analyze and present accurately the current state of knowledge on the main issues of Oral Health and its aspects;
- Participate in the planning, implementation and evaluation of concrete actions in the area of dental hygiene;
- Contribute, as professionals and citizens, to the improvement of oral health and health systems, both in the country and in Europe and the world;
- Reflect and evaluate, critically and continuously, the respective professional practice.

By the end of the program, Master's students should have the ability to produce new knowledge, namely by participating in research studies in Dental Hygiene.

Master's students are also expected to be able to master the pedagogical techniques of presenting issues in public in a way that allows them to participate in the training of individuals and the community as well as in scientific training.

OPERATING RULES

AIMED AT:

Holders of a bachelor's degree in Dental Hygiene or legal equivalent; holders of an academic, scientific or professional curriculum in Dental Hygiene that is recognized by the Scientific Council of the FMDUL as attesting to the capacity to carry out this cycle of studies.

TITLE:

At the end of the course the student receives the official title of Master in Dental Hygiene, awarded by the Faculty of Dental Medicine of the University of Lisbon.

CREDITS & DURATION:

120 ECTS. 2 years

ATTENDANCE:

Presential, with theoretical classes and practical laboratory and clinical components.

TUITION:

2.750€ (first year);

1.500€ (second year)

SCHEDULE:

12 contact hours per week - every Friday. Saturdays every other week (both all day).
